PROFESSIONAL SUMMARY

Software Engineer and Technical Support professional with 3+ years building, debugging, and supporting full-stack applications and enterprise systems. Quickbase Professional Builder certified; recent HIPAA-compliant healthcare delivery for US clinical teams. Proven first-line support background with strong debugging and root-cause analysis; comfortable across low-code platforms (Quickbase), Node.js/TypeScript backends, and workflow orchestration (Temporal.io). 20+ conference talks; author of 'Beyond Data Risk'; 110+ public repositories.

Open to: Software / Solutions Engineer, Quickbase Solutions Engineer, Technical Support Engineer, NOC Engineer, AI Trainer, Integration Engineer, Developer Advocate.

CORE SKILLS

Languages: TypeScript, JavaScript, Python, Go, SQL, Ruby

Frontend: React, Next.js, Angular, Svelte, Tailwind CSS

Backend & Databases: Node.js, Express, REST APIs, PostgreSQL, Prisma, Supabase, Redis

Platforms & Workflow: Quickbase (certified), Quickbase Pipelines, Temporal.io, Microsoft Power Automate, Workday HCM

Support & Operations: Technical Support (L1/L2), Active Directory, HIPAA compliance, DevOps (Linux, Docker, CI/CD), monitoring & incident triage

AI & Data: LLM integration, RAG pipelines, data engineering with Python

WORK EXPERIENCE

Software Solutions Engineer

Imminent Transcendent Solutions | Sep 2025 - Present | Karen, Nairobi, Kenya

- Build and maintain scalable Quickbase applications supporting operational efficiency across multiple business units.
- Automate workflows and integrate third-party systems, reducing manual processes and improving data accuracy.
- Develop custom dashboards, UIs, and reporting tools for real-time decision-making.
- Implement data governance: permission structures, validation rules, and secure access controls.
- Evaluate and integrate APIs; conduct user training and onboarding for high adoption.

Quickbase Solutions Engineer

Ethos Therapy Solutions | Aug 2025 - Present | United States (Remote)

- Lead end-to-end Quickbase development for HIPAA-compliant healthcare applications serving US clinical teams.
- Engineer integrations via Quickbase Pipelines and APIs to sync therapy data with external billing and CRM platforms.
- Optimize performance by auditing legacy structures and refactoring complex many-to-many relationships for faster reporting.
- Build automated workflows and notifications for real-time communication between clinical and admin staff.
- Ensure HIPAA compliance and data security across all solutions with clinical stakeholders.

Founding Engineer

Skystock Developer Limited | Jan 2025 - Jul 2025 | Remote

- Built secure APIs handling 10,000+ daily requests with third-party system integrations.
- Implemented workflow orchestration with Temporal.io - improved system reliability to 99.9% uptime.
- Streamlined business onboarding, cutting setup time from 2 days to under 4 hours.
- Drove MVP launch supporting 50+ active businesses within the first 3 months.

Junior Software Engineer

Opteamio Ltd | Jan 2022 - Dec 2024 | Nairobi, Kenya

- Built and maintained a commercial platform using Svelte, React.js, and Node.js serving 500+ users.
- Worked as Workday Analyst (HCM): wrote integration reports, diagnosed tenant system issues, learned Workday Integration.
- Collaborated on KPI development and aligned tech solutions with business objectives.
- Supported client onboarding and smooth transitions to new technologies.

Information Risk Officer

Opteamio Ltd | Sep 2022 - Feb 2023 | United Kingdom (Remote)

- Led a team of three in implementing an ISMS project for the company.
- Guided client companies through ISO certification processes.
- Conducted software security assessments for company products, covering network security controls.

IT Support Engineer

Gigsasa Ltd | Jan 2023 - Jun 2023 | Nairobi, Kenya

- Diagnosed and resolved hardware, software, and network issues for end-users.
- Installed, configured, and maintained workstations, peripherals, software, and network infrastructure.
- Managed user accounts and access permissions in Active Directory.

SELECTED PROJECTS

SharkPush — Communication Operating System for Africa and emerging markets - intent-driven, multi-channel delivery infrastructure. Go, Next.js, Temporal, NATS, ClickHouse; 15 language SDKs. Live: sharkpush.vercel.app

Aurevia — Market intelligence infrastructure - market data ingestion, quant analytics, risk-gated execution and portfolio intelligence with WebSocket streaming and ML-powered predictions.

Nexora (Nexa Pay) — Stripe-grade multi-rail payment switch for Africa unifying cards, mobile money, bank transfers and stablecoins, with AI fraud detection. Live: nexora-zeta-green.vercel.app

Digital Lending OS — Multi-tenant SaaS platform for Kenyan Digital Credit Providers - loan origination, scoring, disbursement, collections and CBK-ready compliance reporting.

CERTIFICATIONS

- Quickbase Professional Builder - Quickbase University
- Microsoft Azure / Cloud Computing - Microsoft (2021-2022)
- 90 Days of DevOps - Michael Cade / Community (2022)
- Data Engineering with Python - Packt (in progress)

EDUCATION

BSc. Information Technology

Kibabii University | 2018 - 2023 | Kenya | GPA: 3.4

SPEAKING & WRITING

- 20+ conference talks on Angular, Next.js, Server Components, and API Security.
- Author of 'Beyond Data Risk' (data protection and risk).
